Pedro Damian Longoria Arechar

Senior Frontend Engineer · React / Vue / TypeScript · 9+ years

Monterrey, Mexico · Open to remote · damian.lon.are@gmail.com · damianlonare.com · LinkedIn · GitHub · WhatsApp: +52 81 2352 4173

SUMMARY

Senior Frontend Engineer with 9+ years building web platforms with React, TypeScript and Node.js for enterprise clients including The Home Depot, AB InBev (Grupo Modelo), AMIB and Fundación BBVA. Most recently on The Home Depot's Experimentation team, building the edge-based A/B testing system other product teams used to test layouts, search results, products and ads. Comfortable across the stack (Node.js, AWS Serverless, SQL), experienced working fully remote with English-speaking U.S. teams, and a heavy daily user of AI-assisted development (Claude).

EXPERIENCE

Senior React Engineer — Dexian, assigned to The Home Depot (USA)

Nov 2025 – Nov 2026 · Remote · 100% English · Experimentation Team

- Built and maintained an experimentation system using Akamai EdgeWorkers and Adobe Target that enabled other Home Depot product teams to run A/B tests on homedepot.com.
- Delivered experiments that compared product placements, Google ad variants, page layouts and search-result rankings to identify which options drove more sales.
- Developed experimentation initiatives that were later adopted and implemented by other product teams across the organization.
- Owned releases end to end through Home Depot's RFC change-request process, validating features across staging, beta and production.
- Worked in Scrum (Jira, daily stand-ups, sprint ceremonies) with a U.S.-based, English-speaking team.
- Used AI-assisted development (Claude) extensively to speed up implementation, testing and code review.

Stack: React, JavaScript/TypeScript, Akamai EdgeWorkers, Adobe Target, Contentful, Jira

Frontend & Backend Developer — Sngular

Sep 2020 – Oct 2025

Grupo Modelo (AB InBev) — Modelorama & TaDa Delivery admin portal

- Built a React payment processor that let Modelorama store staff accept card payments and pay their product distributors (CEDIS).
- Developed the frontend with Gatsby, React, TypeScript, Redux and GraphQL, including a reusable component library on Ant Design.
- Built Node.js serverless microservices with AWS Lambda, SNS/SQS and DynamoDB, plus MySQL data access with Knex.
- Created analytics dashboards and Excel/Word reports, using Snowflake queries to surface business opportunities.
- Set up unit testing with Jest and React Testing Library, and kept code quality and security high with ESLint, Prettier, Codacy and Snyk.
- Diagnosed production issues with AWS CloudWatch and Travis CI.

AMIB (Mexican Association of Securities Institutions) — Certification portal

- Built the Angular frontend and Node.js API for managing payments for financial certification courses (Docker, PostgreSQL, AWS, Jest).

Fundación BBVA — Donations admin portal

- Built the frontend with Vue 3 Composition API and Pinia (Jest, Axios, Bitbucket).

Full-Stack Developer — FDI Connect

Jun 2019 – Jul 2020

- Built a B2B e-commerce platform: product and inventory management, per-supplier storefronts with their own admin, a global admin, coupons and promotions, and supplier analytics.
- Integrated third-party APIs for strategic clients and Conekta card payments.

Stack: Vue, Vuex, Vuetify, PHP/Symfony, MySQL, AWS, PWA

Frontend Developer — Foodi

May 2017 – Jun 2019

- Built the React/Redux frontend for a multi-vendor e-commerce marketplace: authentication, multi-store, Conekta card payments, inventory and admin.
- Used the Google Maps API to restrict products by the buyer's location, and built analytics dashboards for sellers and investors.
- Delivered responsive web plus an Ionic mobile app.

Stack: React, Redux, Python/Django, PostgreSQL, Docker, AWS, Heroku, Sentry

SKILLS

- **Frontend:** React, TypeScript, JavaScript, Redux, Gatsby, GraphQL, Vue 3, Angular, HTML5, CSS/SASS, Tailwind, Ant Design, Contentful (headless CMS)
- **Experimentation & Edge:** A/B testing, Adobe Target, Akamai EdgeWorkers
- **Backend & Data:** Node.js, AWS Lambda / Serverless, SNS/SQS, DynamoDB, MySQL, PostgreSQL, Snowflake, Python/Django, PHP/Symfony
- **Testing & Quality:** Jest, React Testing Library, ESLint, Prettier, Snyk, Codacy
- **Tools & Process:** Git / Git Flow, GitHub, Bitbucket, Docker, Travis CI, AWS CloudWatch, Jira, Scrum, AI-assisted development (Claude)

EDUCATION

- **Universidad Autónoma de Nuevo León (UANL) — FIME** · Technical Degree in Computer Applications, 2015–2016
- **Universidad Autónoma de Nuevo León (UANL) — FIME** · Technical Degree in Software Development, 2014–2015

LANGUAGES

Spanish — Native · English — Professional working proficiency (daily work with a U.S. team)
